Staff Software Engineer: Legacy Integration & Platform Architecture (Ruby/Rails)

****Target Role:**** Staff Software Engineer: Legacy Integration & Platform Architecture (Ruby/Rails)

****Company:**** NextPatient ****Comp Range:**** \$250,000: \$300,000 / yr (Remote, Full-time) ****Tone**

Calibration:** Understated, fact-dense, zero-fluff. Written for engineering leadership & technical screeners. ---

1. Mission & Architectural Alignment NextPatient's mandate: ****decoupling modern patient experiences** (scheduling, check-in, waitlists, payments) from dated, legacy doctor's office EHR systems******: is a direct match for my 25+ year track record in ****System Cartography, legacy subsystem decoupling, and zero-downtime platform safety****. **### Why This Match Works (3 Grounded Signals):** 1. ****High-Consequence System Integration & Uptime Protection****: Extensive background in 4D System Cartography and operational risk modeling, mapping dark dependencies, lateral state mutations, and establishing release verification gates across deployment pipelines to protect mission-critical uptime. 2. ****Strangler-Fig Decoupling & API Boundary Design****: At OneMain Financial, refactored high-volume financial customer acquisition flows spanning legacy database layers, multi-service Rails state machines, and third-party API supply chains: eliminating hidden lateral state mutations and cross-service blind spots. 3. ****OpenTelemetry & Dark Telemetry Illumination****: Founded and technically led the enterprise OpenTelemetry initiative at OneMain, converting dark legacy microservice behavior into empirical telemetry and quantifiable risk governance. --- **## 2. Fit Matrix & Seniority Calibration**

Dimension	NextPatient Expectation	Mike's Grounded Evidence	Fit Evaluation
Legacy Integration Plug modern SaaS into legacy EHRs without breaking live clinical operations. Strangler-fig API decoupling across financial monoliths; zero-downtime data migrations. ● **Direct Match**	**Backend & Stack** Heavy Ruby on Rails, PostgreSQL, background jobs, zero-downtime migrations. 25+ years Ruby/Rails, PostgreSQL (including pgvector), Sidekiq/Redis, AWS/Kubernetes. ● **Core Stack Match**	**Platform Ownership** Staff IC leadership, responsibility realignment, developer velocity enablement. Founded and technically led ACQ Enablement team at OneMain; led cross-team architecture reviews. ● **Staff/Principal IC Match**	**Culture & Alumni** High technical autonomy, async

documentation, craftsmanship rigor. | Groupon alumnus; founded Software Craftsmanship McHenry County (820+ members); author of *Panoramic View*. |  **Cultural Parity** | --- ## 3. Proven Case Studies for NextPatient Leadership 1. **OneMain Financial Acquisition Lane Realignment (2021 to 2026)**: - *Challenge*: Implicit lateral state mutations across multi-step Rails state machines caused persistent data corruptions in high-volume loan acquisition flows. - *Action*: Refactored workflow state transitions, founded ACQ Enablement to protect remediation work, and deployed enterprise OpenTelemetry tracing across microservice boundaries. - *Outcome*: Established end-to-end distributed tracing, unblocked 4 parallel engineering streams, and eliminated outage cascades. - *Reference*: [case-studies/index.html#onemain-acquisition](https://www.just3ws.com/case-studies/) 2. **SK Holdings & Real Estate Platform Modernization**: - *Challenge*: Monolithic Rails application experiencing search bottlenecks and Sidekiq background queue congestion under high transaction volume. - *Action*: Upgraded core Rails versions with zero downtime, restructured relational database indexes, and modernized asynchronous worker queues. - *Outcome*: Restored application throughput and reduced queue latency across search and transaction pipelines. - *Reference*: [history/index.html#sk-holdings](https://www.just3ws.com/history/) --- ## 4. Archival Technical Discussions & Provenance To evaluate my approach to software craftsmanship, legacy modernization, and technical community leadership: -  **Software Craftsmanship Retrospective**: [Software Craftsmanship McHenry County Retrospective] (https://www.just3ws.com/history/) -  **Panoramic View Architecture Methodology**: [The Panoramic View Discipline](https://www.just3ws.com/panoramic-view/) --- ## 5. Direct Outreach Strategy - **Primary Recruiter**: Sarah Fox (Senior Technical Recruiter, Ex-AWS, Ex-Groupon). - **Outreach Angle**: Lead with common Groupon alumni context + direct evidence of plugging modern Rails interfaces into legacy healthcare and financial platforms without downtime.
