--- layout: brief title: "Brief: Wealth Management CRM - Staff Software Engineer: AI Agents,â€¦" description: "Tailored 1-page executive pitch brief for Staff Software Engineer: AI Agents, Platform & Rails Architecture at Wealth Management CRM." permalink: /exports/briefs/financial-crm-staff-engineer-ai-agents/ breadcrumb: "Wealth Management CRM Brief" breadcrumb_parent_name: Exports breadcrumb_parent_url: /exports/ brief_company: "Wealth Management CRM" brief_role: "Staff Software Engineer: AI Agents, Platform & Rails Architecture" sitemap: false robots: noindex,nofollow body_class: ats-resume --- **Target Role:** Staff Software Engineer: AI Agents, Platform & Rails Architecture **Comp Range:** $150,000: $240,000 / yr (Remote, Full-time) **Tone Calibration:** Understated, fact-dense, zero-fluff. Written for VP of Engineering & Technical Leadership. --- ## 1. Mission & Architectural Alignment The target mandate: **scaling an enterprise financial advisor CRM platform following a $200M funding round, integrating AI agents and workflow automation into core Rails/Postgres architectures**: aligns directly with my experience in **financial enterprise acquisition architecture, local AI workflow orchestration, and high-concurrency Ruby/Postgres platform reliability**. ### Why This Match Works (3 Grounded Signals): 1. **Financial Enterprise Domain & Compliance Scope**: Served as Senior Technical IC and Software Architecture Lead for the Acquisition lane at OneMain Financial, de-risking multi-step financial workflows, customer interaction surfaces, and third-party API supply chains. 2. **AI-Augmented Engineering & Agent Workflows**: Designed and implemented local, privacy-conscious AI agent workflows for codebase cartography, domain rule extraction, and deterministic evaluation: expanding engineering investigative capacity while keeping human verification explicit. 3. **Ruby on Rails, PostgreSQL & Cloud Platform Depth**: Production experience operating Rails, PostgreSQL (including pgvector), Sidekiq/Redis, AWS, Docker, and Kubernetes under live financial transaction loads. --- ## 2. Fit Matrix & Seniority Calibration | Dimension | Target Role Expectation | Mike's Grounded Evidence | Fit Evaluation | | :--- | :--- | :--- | | **Financial CRM Domain** | Wealth management & financial advisor workflows, high data privacy. | 5 years Acquisition lane architecture at OneMain Financial; regulated fintech compliance experience. | ðŸŸ¢ **Direct Domain Match** | | **AI Agents & LLM Integration** | Modernizing CRM workflows with AI agents & automated tools. | Designed local AI cartography workflows & LLM orchestration with deterministic evaluation. | ðŸŸ¢ **Core Technical Match** | | **Core Stack** | Ruby/Rails, PostgreSQL, React, AWS, Terraform, Docker. | Ruby/Rails, PostgreSQL (pgvector), Sidekiq, Redis, AWS/K8s, Linux. | ðŸŸ¢ **Stack Parity** | | **Scale & Growth** | Scaling architecture following $200M growth funding round. | Founded an Acquisition Lane enablement team; decoupled core loan acquisition monoliths into resilient services. | ðŸŸ¢ **Growth / Scale Match** | --- ## 3. Proven Case Studies for Engineering Leadership 1. **OneMain Financial Acquisition Lane Realignment & Telemetry (2021 to 2026)**: - *Challenge*: Scaling high-volume financial customer acquisition flows with implicit lateral state mutations across multi-service Rails state machines. - *Action*: Refactored Rails state transitions, mapped seven acquisition channels, engineered an automated five-phase privacy deletion engine, founded an Acquisition Lane enablement team, and deployed enterprise OpenTelemetry tracing across service boundaries. - *Outcome*: Diagnosed and eliminated a persistent 4% silent traffic drop via DynamoDB session storage remediation, unblocked engineering streams, and built the Enterprise Trace. - *Reference*: [case-studies/index.html#onemain-acquisition](https://www.just3ws.com/case-studies/) 2. **ActiveCampaign CRM Architecture Modernization & Query Optimization**: - *Challenge*: Tightly coupled PHP/MySQL backend and Ember.js frontend scaling rapidly through high customer growth with complex relational contact workflows. - *Action*: Introduced structured query patterns, caching strategies, and hardened unit and end-to-end test suites across core CRM workflows. - *Outcome*: Restored testability, reduced regression cycles, and accelerated developer velocity across contact and deal pipelines. - *Reference*: [history/index.html#activecampaign](https://www.just3ws.com/history/) --- ## 4. ðŸ’¬ 30-Second Interview Calibration (The "Answer, Frame, and Pause" Rule) > *"I combine Ruby on Rails and PostgreSQL platform architecture with hands-on AI agent engineering and regulated fintech domain depth. At OneMain Financial, I led the Acquisition architecture: mapping seven ingress funnels, eliminating a 4% silent traffic drop via DynamoDB session remediation, and building an automated 5-phase PII deletion engine across 30+ tables. Scaling a wealth management CRM after a major growth round requires de-risking core Rails monoliths while safely integrating AI agent workflows, and that intersection is my primary focus."* > > *(Pause & Hook): "I can dive deeper into our local AI agent orchestration patterns, or we can look at how we decoupled multi-step Rails state machines. Which direction would you prefer to explore?"* --- ## 5. ðŸ”— Authoritative Verification Links * **System Cartography Essay:** just3ws.com/2026/08/29/system-cartography-how-to-map-a-ten-year-old-monolith/ * **Portfolio & Case Studies:** just3ws.com/case-studies/ * **Canonical RÃ©sumÃ©:** just3ws.com/resume * **GitHub Profile:** github.com/just3ws
